PROGRAM OF STUDY

The dual degree MBA/MS-FIN program requires credits above and beyond the MBA curriculum. The information below outlines the requirements above the MBA courses. Classes have been scheduled to allow students to meet the dual degree requirements while also taking the most frequently requested elective courses. Students not completing the specialization in FMM need to complete at least nine additional MBA elective credits to meet graduation requirements.

Curriculum topics include:

- Valuation techniques of free cash flow and economic value added
- Capital structure and cost of capital
- Portfolio management and hedge funds
- Quality of earnings
- Hedging and risk analysis
- International currency markets
- Debt and equity securities
- Real options
